January 2023 – March 2023

JavaScript developer

Astana, Kazakhstan

- Responsible for developing, testing, improving front-end components.
- Stack: JavaScript, ReactJs, JQuery, HTML, SCSS

Projects

”Portfolio website for Rakhymzhan Turlybek” | *NextJS 14, React.js, Tailwind CSS*

December, 2023

- I created this website using NextJS and Tailwind CSS technologies. I created this portfolio website for person who needed a solid portfolio website. I implemented creative design, beautiful and organized content and also added background changing animation.

”Movify” | *NextJS 13, React.js, Tailwind CSS*

October, 2023

- During the process of creation of this website, I used latest technologies like NextJS 13 and Tailwind CSS. Moreover, I used an IMBD Api in order to fetch data for this website. The website I developed includes all latest, popular and top-rated movies. You are welcome to use it.
- Stack: Next.js 13, React.js, JavaScript, Tailwind CSS, Git, Client Side Rendering, Server Side Rendering, Fetch API

”Delicious” recipe application | *ReactJS, Spoonacular API*

April, 2023

- I created this website as an university project for ”Software Development Course”. This website has a very solid design and functionality, which allow users to search for any sorts of food, find out how to cook a specific meal, and which ingredients should user use to cook it. I really tried to develop a helpful website, since students often do not know how to cook.
- Stack: ReactJS, JavaScript, Spoonacular API.

Music Player application | *ReactJS*

February, 2023

- I created this project as a simple database for restoring music. I implementd beautiful design to this website, so that it is really comfortable to use it. This website was created with ReactJs library.
- Stack: ReactJS, JavaScript
